Description. Thelchiuda has crimson skin, with dark red hair and gold eyes. She wears modest garments and numerous rings.

Moon Fire. Starting at 1st level, you can call down the radiant light of the moon on command. You learn the Sacred Flame spell, which doesn't count against the number of sorcerer cantrips you know. When you cast the spell, you can target one creature as normal or target two creatures within range that are within 5 feet of each other.

Font of Magic. Sorcery Points You have 6 sorcery points, and you gain more as you reach higher levels, as shown in the Sorcery Points column of the Sorcerer table. You can never have more sorcery points than shown on the table for your level. You regain all spent sorcery points when you finish a long rest.

Flexible Casting. You can use your sorcery points to gain additional spell slots, or sacrifice spell slots to gain additional sorcery points. You learn other ways to use your sorcery points as you reach higher levels.

Creating Spell Slots. You can transform unexpended sorcery points into one spell slot as a bonus action on your turn. The Creating Spell Slots table shows the cost of creating a spell slot of a given level. You can create spell slots no higher in level than 5th. Any spell slot you create with this feature vanishes when you finish a long rest.

Converting a Spell Slot to Sorcery Points. As a bonus action on your turn, you can expend one spell slot and gain a number of sorcery points equal to the slot's level.

Metamagic. At 3rd level, you gain the ability to twist your spells to suit your needs. You gain two of the following Metamagic options of your choice.

You can use only one Metamagic option on a spell when you cast it, unless otherwise noted.

Careful Spell. When you cast a spell that forces other creatures to make a saving throw, you can protect some of those creatures from the spell's full force. To do so, you spend 1 sorcery point and choose a number of those creatures up to your Charisma modifier (minimum of one creature). A chosen creature automatically succeeds on its saving throw against the spell.

Seeking Spell. If you make an attack roll for a spell and miss, you can spend 2 sorcerer points to reroll the d20, and you must use the new roll.

You can use Seeking Spell even if you have already used a different Metamagic option during the casting of the spell.

Lunar Boons. Starting at 6th level, the current phase of your Lunar Embodiment can affect your Metamagic feature. Each Lunar Embodiment phase is associated with certain schools of magic, as shown here:

Full Moon. Abjuration and Divination spells

New Moon. Enchantment and Necromancy spells

Crescent Moon. Illusion and Transmutation spells

Whenever you use Metamagic on a spell of a school of magic associated with your current Lunar Embodiment phase, you can reduce the sorcery points spent by 1 (minimum 0). You can reduce the sorcery points spent for your Metamagic a number of times equal to your proficiency bonus, and you regain all expended uses when you finish a long rest

Waxing and Waning. Starting at 6th level, you gain greater control over the phases of your lunar magic. As a bonus action, you can spend 1 sorcery point to change your current Lunar Embodiment phase for a different one.

You can now cast one 1st-level spell from each lunar phase of the Lunar Spells table once without expending a spell slot, provided your current phase is the same as the lunar phase spell. Once you cast a lunar phase spell in this way, you can't do so again until you finish a long rest.
